C ntinuati n Sh et (PTOL-303) 009/917,058

Continuation of 5. does NOT place the application in condition for allowance because: the claims use the language "comprising" which does not limit what the composition includes. Since it known that platelets are complex and include different elements, it can be said that MacPhee satisfies the limitation because the claims do not recite a more specific definition of platelet like "purified" or other forms to define what features of the platelet are important.
